

Dennis C. Glaser, R.Ph., MBA

Dennis Glaser has been involved in the pharmaceutical and clinical trial industries for over 2 decades. His career includes extended time with a major pharmaceutical company, followed by key developmental and managerial positions within two of the industry's leading SMOs, and, most recently, stints with market leaders within the CRO industry. Over this time period, Mr. Glaser has earned a reputation for being a results-oriented, customer-focused professional. His record of recognizing and exceeding client needs is unsurpassed within the industry.

WHY USE THE SERVICES OF INDEPENDENT MONITORS?

A Clinical Research Associate represents your eyes and ears at the investigative clinical trial site. It is important to know that these representatives have the clinical and scientific background to do the job and to do it well. And an excellent source of these highly skilled professionals can be found in the seasoned group of independent, contract monitors located across the country.

There are many good reasons to use the services of independent, contract monitors. They are frequently used to:

- Supplement shortages in internal staffing
- Reduce the risk associated with hiring and supporting staff
- Provide specialized assistance for difficult or problem situations

Independent monitors can help you better manage your project.

Independent CRAs are among the most experienced professional monitors available. These clinical research professionals have chosen monitoring as their career and they have dedicated years toward perfecting their craft.

And now their services are available for you.

WHY TURN TO THE GLASER RESEARCH GROUP?

The monitors at Glaser Research Group have been pre-screened and are among the best in the industry. They are personally known to the group and have developed working relationships with us. You will not be presented with a CV, you will be presented with a clinical research professional that you can trust.

Glaser Research Group will work with the monitors throughout the duration of the project. Oversight will help assure that all visits and reports occur in a timely, accurate and standardized manner according to corporate and sponsor SOPs.

All monitoring visits for a given project can be billed monthly on a single invoice, simplifying your record keeping and payment hassles.

TRAINING AND SUPPORT

Independent monitors are among the best trained individuals in the industry. Training and retraining assure you that Glaser monitors are up-to-date and have been exposed to the latest information and technologies.

Glaser Research Group Corporate support means that you will receive whatever problem-solving or troubleshooting may be required. It also means that the independent monitor has a support network available when needed.

Helping us all work together. That is what Glaser Research Group brings to your project.

Therapeutic Areas

Due to the depth of experience and wide diversity of backgrounds found within our group of independent monitors, CRAs can be provided with experience in virtually any indication or therapeutic area from the most esoteric to the most mundane.

In addition, our monitors have worked with and helped assure the success of projects for a wide variety of pharmaceutical and biotech companies around the globe.

For further information, please give us a call. Let us help you and your team by providing experienced, independent monitors for your next project.
